HARNESSING ENERGY AND MAXIMIZING SECURITY

ENERGY

- Cobalt provides Energy Star rated roofs that even meet California Title 24 energy strict standards and Cool Roof Rating Council allowing building owners to gain LEED credits
- CertainTeed Coolstar Modified Bitumen and Firestone UltraPly TPO roof membranes dramatically reduce roof surface temperatures. These membranes may reduce peak cooling demand by as much as 15% or allow building owners to install less expensive cooling systems.
- These membranes installed by Cobalt reduce roof temperatures, deflect solar rays and extend the life of your roof.
- Technology utilized by Cobalt eliminates harmful hot asphalt/tar, open flames, high VOC TPO bonding adhesives– easing our footprint on the environment and hazards/liabilities to your building

SECURITY

- Cobalt is a **CERTAINTED STAR CERTIFIED COMPANY, A FIRESTONE REDSHIELD CERTIFIED COMPANY AND A VERSICO CERTIFIED COMPANY** assuring you of the utmost in quality and workmanship
- Cobalt can provide you manufacturer full system NDL (No Dollar Limit) Warranties from these manufacturers covering workmanship, installation and materials– only available from certified companies such as Cobalt.
- Cobalt designs your roof system with the appropriate wind design load in mind and has the knowledge to install FM Global rated systems
- Cobalt offers roof maintenance programs that keep your roof operating in its peak efficiency and help you discover problems before the discover you.

SPECIAL OFFER:
